# WOODCREATE

## INSPIRED BY CREATION

Wood of the same species, even growing side by side, is affected differently by the climate and elements required for growth. These factors combine to create the distinctive beauty of characteristics like grain and colour variations, along with distinctive markings such as streaks and knots.

To allow nature's creations to be enhanced to their full potential, Fairview has developed a vast range of finishes that incorporate natural beauty and a distinctive appearance, derived from the inherent qualities & characteristics of wood itself.

# NATURALINE

## INSPIRED BY ELEMENTS

Natural metal finishes are significantly increasing in popularity and being widely used in many applications in the building industry, generally to magnify rather than diminish the appearance of any imperfections.

Elements are chemically the simplest substances and hence cannot be broken down using chemical methods. Elements can only be changed into other elements using nuclear methods. Some elements have been known for thousands of years, and who originally discovered them remains a mystery...

Fairview have produced a selection consisting of natural metals as well as imitation finishes, distinctive enough to provide a generous palette of colours to compliment the final appeal of your product and project, so the ability to mix 'n match becomes very easy.
